#### REPORT OF THE MANAGER TO THE UNITHOLDERS

After a disappointing 2018, the A-share Shanghai Composite Index rose by 19.45% in 1H2019, mainly due to the following factors: 1) On January 4, 2019, the People's Bank of China announced to cut the requirement reserve ratio (RRR), which injected money into the market and boosted investors' confidence. 2) At the end of 2018, the A-share valuation is at a low level. According to the statistics from Wind, on December 28, 2018, the Shanghai Composite Index PE ratio TTM is 11.0x, while HS300 PE ratio TTM is 10.23x. After the market vitality was stimulated, the market ushered in a rapid rise. On April 9, 2019, the Shanghai Composite Index reached 3288.45, which was the highest in 1H2019. The later period was affected by the policies, which triggered the market's concerns on the sustainability of the easing situation. In the meantime, the Sino-US trade conflict resulted in a wave of significant correction of the index. Looking back at the 1H2019's market situation, although the market fluctuated repeatedly, we believe that the A-share market has already been out of the 2018 downward trend. Besides, in the normal situation of Sino-US trade conflict, the economic situation is hugely resilient and has enormous potential. According to the Bureau of Statistics data, China's GDP increased by 6.3% in 1H2019.

In 1H2019, the Fund preferred selecting stocks from constituent stocks to the CSI 300 Index. As of June 30, 2019, the net assets of Fund's RMB R-class and I-class have increased by 21.32% and 21.50% respectively.
